Dynatech Systems

09/2022 – Present
Ahmedabad

Microsoft D365 Application Developer

- Developed and customized multiple Power Pages portals for business-facing and customer-facing use cases using Dataverse, Liquid, JavaScript, and custom web templates.
- Designed and configured Dataverse tables, forms, and relationships to support portal functionalities.
- Built automated business workflows using Power Automate for email notifications, approvals, validations, and data synchronization.
- Implemented secure authentication and authorization using web roles, table permissions, Azure AD B2C, and custom access logic.
- Customized portal UI using HTML, CSS, and JavaScript to build responsive, user-friendly page layouts.
- Integrated external systems and REST APIs into Power Pages for real-time data updates and form submissions.
- Conducted portal performance optimizations, reducing load times by improving query logic and minimizing unused components.
- Collaborated with stakeholders to understand business processes, translate requirements into technical designs, and deliver high-quality solutions.
- Worked within Agile/Scrum teams to deliver incremental enhancements and support ongoing portal improvements.
- Implemented end-to-end ALM using Power Platform Pipelines for automated solution deployment across Dev, Test, and Prod environments.
- Managed unpacking, packing, versioning, and deployment of solutions using Power Platform Pipelines for consistent and error-free releases.
